[FOR HIRE] [REMOTE] Hello, everybody. This is Colin based in Canada. Self-motivated, energetic collaborator who thrives on working in a fast-paced environment with tight deadlines and have a desire to stay updated on current and new technologies. As a passionate Senior full-stack developer with 6 years of experience in modern JS & PHP such as **React**,**Vue**,**Angular** etc, I'm thrilled to leverage my technical expertise to implement client's ideas into reality. Recently, leaving a contract job from comcate, looking a opportunity to work in remote position. If there are any hiring managers in this channel(& are looking for a potential candidate, will be happy to put forward my candidacy.

Aleh   August 23rd at 4:41 AM
Do you consider out-staffing? We can find a developer for you. intouch@agileintegrity.ai (http://agileintegrity.ai/) or dm

Hello everybody!:heart_eyes: I wanna learn all part of data science and I have no idea where to start and how to go. I will be very appreciated for any advise.:slightly_smiling_face:

Katlego Molokomme   August 22nd at 9:59 AM
Hi developers, I just need to find out if this is possible and how to achieve it.I need to search(not filter) data from an API using angular 7. I came across a lot of resources but they only do data filtering instead of search.

Sam Krosnick   August 22nd at 10:01 AM
Hi All — curious if there are any developers on here that have won a hackathon.If you have feel free to DM me! Thanks!

Razor King   August 22nd at 8:10 PM
Hello, everyone. Is there anyone here who has experience of developing arbitrage bot using smart contract? If so, please help me on what is the basic idea behind it and is there any source code about it.

Petrukovich   August 22nd at 10:48 PM
Hi, everyone. Nice to meet you.
